

The Town of Surf City strives to protect our community during the COVID-19 pandemic. We understand the upcoming weather will entice people to want to access the beach during this time. The decision to temporarily close our 36 public beach access, public parking lots, and parks was implemented in efforts to reduce the number of visitors coming into Town. This strategy has been extremely successful in achieving that goal. We take this pandemic seriously and hope everyone in our community does too. Please do your part in social distancing, limiting your travel, and quarantining when possible.

As a reminder, accessing the beach via private property without consent is considered trespassing and those individuals can be charged criminally. Trespassing also applies to our public beach accesses, parking lots, and parks due to the closure implemented during this State of Emergency. Please use this time to protect yourself and follow the guidelines put in place.
